Total	1,764	1,247	41.5%	4,043	2,983	35.5%

*Including regional

Full Financial Year

More than 4 million passengers travelled through Adelaide Airport during the full 2021/2022 Financial Year. Total passengers were 35.5% more than last year and almost 50% of pre-COVID-19 passenger volumes despite the significant restrictions placed upon travel in the first half of the financial year.

Final Quarter of FY22

Almost 1.7 million passengers travelled domestically in the June 2022 quarter recovering to 92.5% of pre-COVID levels. Domestic travel confidence and demand has been strong since the Easter school holidays and has built throughout the quarter.

International traffic in the June 2022 was 5.5 times the same period last year following the reopening of Australian borders in February and due to the re-opening of many other international borders. Most notably the re-opening of New Zealand, which saw the commencement of Qatar Airways' non-stop services between Adelaide and Auckland, as well as the re-opening of Indonesia's borders, which saw the return of Jetstar's Adelaide-Bali services from May. International passenger levels grew to 31% of pre-COVID volumes for the quarter and demand has continued to accelerate into the first week of July, with the resumption of Fiji Airways services to Nadi, Air New Zealand's recommencement of flights to Auckland and Qatar Airways' increase in frequencies from 3 to 5 times weekly.

Quarter in Review
